

### Healthy School Act of 2000 - Notification

The Healthy School Act of 2000 was signed into law in September 2000 and requires that all schools provide parents or guardians of students with annual written notification of expected pesticide use on school sites. The notification will identify the active ingredient or ingredients in each pesticide product and will include the Internet address (<http://www.cdpr.ca.gov>) for further information on pesticides and their alternatives.

It is our goal to maintain a safe and healthy learning environment with our school facilities. To that end, it is the standard operating procedure of the district to post warning signs 24 hours in advance of all pesticide applications at all sites. In addition, parents or guardians may request prior notification of individual pesticide applications at the school sites. People listed on this registry will be notified at least 72 hours before pesticides are applied. If your child has significant health problems, or you would like to be notified every time we apply a pesticide, please contact: Brian Shreve, Director of Maintenance, Operations, and Transportation, 1585 Roger Street, Milpitas, CA 95035 or by phone at (408) 635-2888.

The Healthy School Act of 2000 requires all California school districts to notify parents and guardians of pesticides they expect to apply during the year. The district may use the following pesticides in and around your school this year.
